

MACKINBOUNDS™

ALWAYS TOUGH. BUILT TO LAST. **FULLY GUARANTEED.**

Carefully manufactured at our dedicated Mackin-owned production facility.

MackinBounds™ are the nation's best prebounds year after year – guaranteed.

- **100% guaranteed** Kids are no match for the durable MackinBound book. Our books are bound to meet high-volume circulations and are fully **guaranteed against defects as long as the purchased ISBNs remain in print.** If you do need to replace a book, it will be fully cataloged and processed exactly like the original.
- **Saves you money** Choose MackinBound binding and you'll eliminate the cost of replacing your worn-out paperbacks. Plus, MackinBounds generally cost less than library or trade bindings.
- **Always free standard cataloging and processing** As with all your Mackin books, your MackinBounds will be delivered shelf-ready with our precision cataloging and processing. You'll be amazed at how great they look on your library shelves.

Largest Selection. Lowest prices.

Mackin has the largest age-appropriate PreK-12 database in the country. You're not limited to an inventory sitting in a warehouse. Plus, MackinBound books usually cost less than Permabound, Bound to Stay Bound, FollettBound, or any other prebound supplier.

Colorful, Sharp Cover Art. First, the entire cover of the original paperback is scanned at **high resolution** — front, back and spine. If needed, we reproduce the title on the spine so it's easy to read. Finally, we print the covers using advanced four-color digital technology to create a look that is as good as — or better than — the paperback cover.

Tough Binding for All Sizes. For sewn books, we use high-strength polyester thread that will last through the years. Glued MackinBounds have a tough double-fan binding. We use a slow-drying PVA cold glue that is flexible and **won't crack over time**. For books with small gutter margins, we notch the book before applying the glue, which prevents the words and pictures from getting lost in the gutter.

Durable, Flat Spine. For added strength and reinforcement, a strip of hard flexboard — the same thickness as the cover — is placed in the spine. The flexboard makes the spine flat and **easy to read** on the shelf.

No lead-based products or toxic glues!

Flat spine is easy to read!

Class A Binding. High-density binder board (88-point thickness) is used to construct MackinBound covers, meeting strength specifications for Class A library binding.

End Sheets Won't Fade. Acid-free end sheets are used in every book and **won't turn yellow** over time.

Cover Wipes Clean. MackinBound covers are protected with an **easy-to-clean**, long-lasting nylon laminate. Dirt and spills wipe right off!

Consumer Safety First. MackinBound books are constructed with quality materials — no lead products or toxic glues — so you can be assured that our books are safe for your students and staff.

Perfect for graphic novels!

Cross-gutter text & art look spectacular!
